- B1
1. (Twice Amended) A method for implementing call forwarding in a mobile system comprising at least one forwarding exchange for carrying out call forwarding via one of several alternative lines on the basis of subscriber data related to the call forwarding, and at least one subscriber database for storing the subscriber data related to the call forwarding, the method comprising:
 - receiving at the forwarding exchange a call set-up message addressed to a subscriber in the mobile system;
 - performing a subscriber data request to the subscriber database;
 - transmitting a response message from the subscriber database to the forwarding exchange, the message comprising data indicating the call forwarding, a forwarding number and a basic service code; and
